LaTeX is a high-quality typesetting system; it includes features designed for the production of technical and scientific documentation. LaTeX is the de facto standard for the communication and publication of scientific documents. LaTeX is available as [free software](#). You don't have to pay for using LaTeX, i.e.,

there are no license fees, etc. But you are, of course, invited to support the maintenance and development efforts through a [donation to the TeX Users Group \(choose LaTeX Project contribution\)](#) if you are satisfied with LaTeX.
